Job Opportunities Assessment – Example Questions

Before you start the assessment, have a look through this set of example questions. They will give you a good feel for the types of questions that we use, and how they will look on your screen.
**Cognitive Ability Test - Example Questions**

Four of the following are alike in some way. Please select the other two.

- [ ] walk
- [ ] train
- [ ] bus
- [ ] car
- [ ] boat
- [ ] run

**Answer?** The answer here is “walk” and “run”, as all of the other things are a type of transport.
In questions like this sometimes it can be useful to work out what the numbers are in the dotted boxes. In this example notice that you can get the right answer by working either across or up & down.

Answer? The answer is 4.
Cognitive Ability Test - Example Questions

Which two of the five items do not belong with the others?

Answer? You would need to highlight both of the shapes that have an even number of dots in them (i.e. the circle containing 2 dots & the circle containing 4 dots)
Answer? You would need to select “The only hair that Jane likes is brown” and “Jane likes the colour of Megan’s hair”. Together these two statements prove that Megan has brown hair.
Answer? Because they do not belong with their respective groups, you would need to select the only shape that is shaded with a single knob plus the only non-shaded shape with four knobs.
**Answer?** The answer is 21.
Past the number 7, numbers in the sequence run in pairs and go up by seven each time.
The answer is 3.5.
This is calculated as follows: 70km ÷ 20km per hour = 3.5 hours (which is the time taken in hours)
